Foresta lamp

In blown glass, shaped by hand, satin finished and polished

Italy, 2025

h: 49 cm d: 20 cm

The Foresta lamp is part of a series of pieces directly inspired by the native vegetation of the Venetian Lagoon, a fragile ecosystem in which land and water merge. These luminous works translate the silent soul of the lagoon into artistic form, interpreting the natural silhouettes of reeds, samphire, tamarisks, and other plant species that inhabit the salt marshes; resilient, ever-changing flora deeply rooted in both place and time.
