Catharsis - Prototype

Glass, spotlight, fluorocarbon

230 - 24V, 1-10V, dimmable driver

UK, 2025

Catharsis is a kinetic light installation composed of three tumbling elements that respond to natural airflow. Through gentle movement, they project a continuously shifting, never-repeating composition of colour onto the wall. The work echos those moments where everything changes—when structure decomposes into liquid, and liquid vaporises into air. This kinetic light sculpture takes you on a journey: a passage through states of dissolution, renewal, and the arrival of something entirely new.
